

# GAYATRI PADALIA

Haldwani, Uttarakhand - 263139

☎ 9412926237 | ✉ gayatripadalia@gmail.com | 💻 leetcode/gayatripadalia | 🔗 linkedin/gayatripadalia | 🐙 github/gayatripadalia

## Education

### Graphic Era Hill University

Bachelor of Computer Applications (AI & Data Science) | (CGPA: 9.22)

July 2024 - July 2027

### Rajiv Gandhi Navodaya Vidyalaya

Intermediate and Matriculation, (Intermediate: 72.6 %, Matriculation: 84.6 %)

April 2017 - April 2024

## Projects

### Bakery Management System | *Python, MySQL, VS Code*

- Engineered a bakery management system to automate daily **sales, billing, and inventory tracking**, significantly **reducing** manual effort by **40%**.
- Developed an **intuitive menu-driven interface** in Python to efficiently manage product record operations (add, update, delete).
- Integrated a **MySQL database** for **robust and secure** data storage and **optimized retrieval** of sales and stock information.

### Student Performance Predictor | *Python, Scikit-learn, Pandas*

- Developed a machine learning model to predict student pass/fail outcomes using **classification techniques**.
- Conducted **Exploratory Data Analysis (EDA)** and **applied feature engineering** (encoding, scaling) to improve data quality and model performance.
- Trained and optimized multiple models (Logistic Regression, Decision Tree, Random Forest), achieving **75–80% accuracy on test data**.
- Evaluated performance using accuracy, precision, recall, F1-score, and confusion matrix; visualized insights using **Seaborn and Matplotlib**.

### Sentiment Analysis on Twitter Airline Data | *Python, NLP, Scikit-learn*

- Built an end-to-end **NLP-based sentiment classification model** using **TF-IDF vectorization** and **Logistic Regression** on 14K+ airline tweets.
- Implemented advanced **text preprocessing** (regex cleaning, stopword tuning with negation handling, lemmatization) to improve feature quality and model performance.
- Trained a **balanced Logistic Regression model** with optimized hyperparameters, achieving **85%+ accuracy** with strong generalization on test data.

## Technical Skills

**Languages:** C++, Python, JavaScript, SQL

**Machine Learning & AI:** Machine Learning, NLP, Scikit-learn, TensorFlow

**Libraries:** Pandas, NumPy, Matplotlib, Seaborn

**Web Technologies:** HTML, CSS, Flask

**Databases:** MySQL, MongoDB

**Creative Tools:** Blender (3D Modeling & Rendering), ArtRage, Krita

**Developer Tools:** Google Colab, GitHub, VS Code

## Leadership & Achievements

- Serving as **Class Representative (CR)** at Graphic Era Hill University, Haldwani (Aug 2024 – Present), **proactively leading and coordinating** academic communication, attendance management, and collaborative study initiatives to foster teamwork and ensure timely project submissions.
- Secured **2nd** position in the Inter-Campus Codethon (Feb 2025) at GEHU Bhimtal by **designing and implementing an optimized coding solution**, demonstrating strong logical accuracy and **high-performance problem-solving** under strict time constraints.
- Led a team of developers at a hackathon at GEHU Bhimtal to design and develop** a machine learning-based Faculty Attendance Management System using Python, MySQL, and MediaPipe for automated punch-in/out with facial verification, enhancing attendance tracking efficiency.
- Led a team of developers at a hackathon at GEHU Haldwani to design and develop** a full-stack event registration web application using the MERN stack, streamlining online user registration and data management.

## Courses & Certifications

- AWS Skill Centers - Becoming a Cloud Practitioner (Part 1: Cloud Basics)**
- AWS Artificial Intelligence Practitioner Learning Plan**
- AWS Cloud Essentials**
- Hands-on experience with EC2, VPC, EBS, IAM, and serverless services; **successfully deployed** secure static websites on AWS.

## Relevant Coursework

- Data Structures and Algorithms
- Database Management Systems
- Data Science
- Artificial Intelligence
- MySQL and Relational Databases
